

DRAGON MODEL 4x2

DRAGON V, with its superior power, high-strength steel frame and lower self-weight, is your first choice for short and medium distance fast logistics.

RIGID TRACTOR DRAGON SERIES MODEL 4x2

FAW TRUCKS, a Chinese truck brand independently developed in China with 7 million truck users all over the world. Its annual sales of medium and heavy duty trucks of a single brand ranked first in the world in 2018, 2019 and 2020. FAW TRUCKS DRAGON V is the mid-end truck in China which is featured with its stronger power, lower price by 15-50%, higher attendance rate 2-5/day, and fuel saving of 1~2L per 100 kilometres, building a fuel-efficient, comfortable and reliable money-making machine.

FEATURES AND BENEFITS

Safe Protection

Combined rearview mirror without dead angle ensures safety while advancing, reversing and parking on the side; all-steel cab and three-section split metal bumper are durable and easy to replace; the door has an anti-collision beam with small side window design, increasing the safety while side collisions.

Comfortable Driving and Riding

Brand-new instrument panel and wide-body flat floor provide a better driving and riding experience.

Reliable Performance

Adopting suspension clutch, brake system, and aluminium alloy fuel tank makes it corrosion-resistant, lightweight, safe and reliable; unique rolling-formed frame, with high strength and high precision, improves the complete vehicle carrying capacity, suitable for urban and intercity efficient logistics.

Strong Power

Equipped with FAWDE and WEICHAJ engines, FAW/FAST transmission and FAW/PX axle, it is powerful, fuel-saving and environmental friendly.

ENGINE - CA6DK / 4DK

Engine for world-class medium duty and heavy duty trucks with advantages of fuel saving, reliability and strong power.

CA6DK engine has a displacement of 7.1L, power range of 240-320PS and max. torque of 1,200Nm. CA4DK engine has a displacement of 4.7L, power range of 140-220PS and max. torque of 820Nm.
